GSX-R600 (1997-2000)

Public debate on the rising cost of new biotechnology drug treatments has intensified over the last few years as healthcare budget pressures have mounted under a strained economy. Meanwhile, the demand for new, effective medical and drug treatments continues to rise as unhealthy lifestyles cause further increases in diabetes and cardiovascular disease. Global drug pricing is one of the most hotly debated yet least understood aspects of the pharmaceutical industry. How should drug prices be set and what does it mean for patients? Why do governments increasingly get involved, and what is its impact on the global competitive environment? How can a life-saving industry have a poorer image than gun and tobacco industries, whose products are associated with death? Ed Schoonveld explains how pharmaceutical prices are determined in a complex global payer environment and what

factors influence the process. His insights will help a wide range of audiences, from healthcare industry professionals to policy makers and the broader public, to gain a better understanding of this highly complex and emotionally charged field. The Price of Global Health is recognized as a valued and unique reference book that covers a complete array of topics related to global pharmaceutical pricing. It contains an in-depth but straightforward exploration of the pharmaceutical pricing strategy process, its underlying market access, general business and ethical considerations, and its implications for payers, physicians and patients. It is a much-needed and invaluable resource for anybody interested or involved in, or affected by, the development, funding and use of prescription drugs. In particular, it is of critical importance to pharmaceutical company executives and other leaders and professionals in commercialization and drug development, including marketing, business development, market access and pricing, clinical development, drug discovery, regulatory affairs, health outcomes, market research and public affairs. The second edition includes new chapters on payer value story development, oncology, orphan drugs and payer negotiations. Furthermore, many country chapters have been substantially updated to reflect changes in the healthcare systems, including the Affordable Care Act in the US, AMNOG in Germany, medico-economic requirements in

The phrase, Bonneville Salt Flats, strikes a chord with any true gear-head. For motorcycle enthusiasts the allure is even stronger. How to Build a Bonneville Salt Flats Motorcycle documents the construction of "The Worlds Fastest Panhead," conceived and assembled by Keith Ball, former editor of Easyriders magazine. Building a Bonneville Salt Flats winner presents a whole series of hurdles. Keith describes each hurdle, and how it was overcome, from determining the best frame dimensions to making the un-streamlined machine as aerodynamic as possible.
