3 simple strategies to earn high returns and beat the professionals Would you like to use a simple, low-risk investing system that beats market indexes and fund manager performance over the long term, but requires only a few minutes of your time each month? Does it sound like a lot of hard work? It's not - even the laziest investor can achieve it. The Idle Investor includes three straightforward DIY strategies for long-term investing. All you have to do is follow the simple rules. Each method requires only a limited amount of your time and they all make use of easily accessible, low-cost funds. The reasons why the strategies work and everything else you need to know to put them into practice is explained clearly, with numerous worked examples. The three strategies are: 1. The Bone Idle Strategy: Part of your portfolio is allocated to shares and part is allocated to bonds, with adjustments only required twice a year. The rest of the time you do nothing. 2. The Summer Hibernation Strategy: For part of the year your portfolio is allocated to shares and for part of the year it is allocated to bonds. Once again, adjustments to the portfolio are only required twice per year. The rest of the time you do nothing. 3. Multi-Asset Trending Strategy: A simple trend-following method determines whether to hold your portfolio in shares or bonds. For this strategy you will need to check your investments and make adjustments once a month. Even on the very few occasions each year when action is required - twice a year for strategies 1 and 2, and once a month for strategy 3 - you'll only spend a few minutes checking your portfolio and making simple changes. The activity levels range from yearly rebalancing, for the laziest investor, through to monthly reallocation, for those who are more active. How much you do depends on how lazy you are feeling. Testing the three Idle Investor strategies for the period 1990 to 2012 resulted in average annual returns of up to 28%. Compare this to a buy-and-hold approach of investing in UK shares, which would have delivered 8.5% per year over the same period, and you can see that being idle doesn't mean being unsuccessful! If you are looking for a straightforward investing method that lets you get on with your life while your money grows in the background, then become an Idle Investor.

My husband died the day after Christmas, leaving four children, ages two to nine. Anxious how we would manage without him, too young to understand, my children asked, "Why my daddy?" While vacationing at my brother's lake cabin, in Michigan's Northern Wood, we watched a mother raccoon and her babies feeding daily at the stump outside our kitchen window when the idea came to write my stories through the eyes of animals. The first book in The Waddodles of Hollow Lake series, Law of the Woodland, is built on family values, tales of courage, love, hope and trust in each other. The second series book, The Waddodles of Hollow Lake: Calamity on East Bay features more exciting adventures with The Waddodles and their friends, highlighting many episodes with their enemies, The Ruffin twins, Old Mr. Grump and "The Beast" Big Casey, the meanest black bear in all the territories circling Hollow Lake. Will the Raccoon Waddodle Family have to move from their rock den on East Bay to a safe new home? How will The Waddodles have the courage to leave the only home they have ever known and loved? Who will protect Harriet and her children now that Theodore is gone forever? Read it to find out?

700 Opening Traps is a unique collection of chess moves which set up the opponent to fall into a mating traps. All the games have been derived from practical play, from amateur to Grandmaster level. Opening traps are useful in

blitz play, Internet play, and usually with players who do not study opening theory. And at one time or another, all players, from Grandmaster to novice, have fallen for a chess trap or sprung one on some unsuspecting opponent. This books contains basic chess instructions for the novice as well as hundreds of chess positions that will help even the most experience chess players master the art of the chess trap. Another great publication from notable chess Master and author Bill Wall!

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractorsof America procedure for sizing residential duct systems. This procedureuses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads todetermine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacture's blower performance tables). This assures that appropriate airflow is delivered toall rooms and spaces; and that system airflow is compatible with the operatingrange of primary equipment. The capabilities and sensitivities of this procedureare compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or avariable-speed blower (ECM or constant torque motor, or a true variable speed motor).Edition Three, Version 2.50 of Manual D (D3) specifically identifiesnormative requirements, and specifically identifies related informative material.

Technologies such as renewable energy alternatives including wind, solar and biomass, storage technologies and electric engines are creating a different landscape for the electricity industry. Using sources and ideas from technologies such as renewable energy alternatives, Research and Technology Management in the Electricity Industry explores a different landscape for this industry and applies it to the electric industry supported by real industry cases. Divided into three sections, Research and Technology Management in the Electricity Industry introduces a range of methods and tools including technology assessment, forecasting, roadmapping, research and development portfolio management and technology transfer. These tools are the applied to emerging technologies in this industry with case studies including data from various organizations including Bonneville Power Administration and Energy Trust of Oregon, from sectors including lighting and wind energy. The final section considers innovation through these technologies. A product result of a collaboration between Bonneville Power Administration and Portland State University, Research and Technology Management in the Electricity Industry is a comprehensive collection of methods, tools, examples and pathways for future innovation in the electricity industry.

Offers tips on planning an inexpensive wedding, including advice on gown deposits, ceremony and reception sites, and selecting invitations

Presents detailed instructions for building a professional home recording studio, including how to design the room, wiring, codes and permits, and isolation techniques.

In this paradigm-shattering book, leading behavioural economist and food psychologist Brian Wansink - dubbed the 'Sherlock Holmes of food' and the 'wizard of why' - offers a radical new philosophy for weight loss. The answer isn't to tell people what to do: it's to set up their living environments so that they will naturally lose weight. Using cutting-edge, never-before-seen research from his acclaimed Food and Brand Lab at Cornell University, Wansink reveals how innovative and inexpensive design changes - from home kitchens to restaurants, from grocery stores to schools and workplaces - can make it mindlessly easy for people to eat healthier and make it more profitable for the companies who sell the food. In Slim by Design, Wansink argues that the easiest, quickest and most natural way to reverse weight gain is to work with human nature, not against it. He demonstrates how schools can nudge kids to take an apple instead of a cookie, how restaurants can increase profits by selling half-size portions, how supermarkets can double the amount of fruits and vegetables they sell, and how anyone can cut plate refills at home by more than a third. Interweaving drawings, charts, floor plans and scorecards with new scientific studies and compelling insights that will make you view your surroundings in an entirely fresh way, this entertaining, eye-opening book offers practical solutions for changing your everyday environment to make you, your family and even your community slim by design.

Provides the latest information about indoor air quality problems and how to prevent and correct them. Packed with valuable information on how to: develop an indoor air quality building profile; create an indoor air quality management plan; identify causes and solutions to problems as they occur, and identify appropriate control strategies. Special sections cover: air quality sampling; heating, ventilating, and air conditioning systems; mold and moisture problems, and much more. In looseleaf binder with tabbed dividers.
