the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and

This book explores
one of the most
discussed and
investigated novel
foods in recent years:
edible insects. The
increasing demand for
alternative protein
sources worldwide
had led the Food and
Agriculture

File Type PDF

Atlante

Organization of the United Nations (FAO) to promote the potential of using insects both for feed and food, establishing a program called “Edible Insects.”

Although several social, environmental, and nutritional benefits of the use of insects in the human diet have been

File Type PDF

Atlante

identified, the majority of the population in Western countries rejects the idea of adopting insects as food, predominantly for cultural reasons. Nevertheless, international interest in promoting the consumption of insects has grown significantly, mainly in North America and

File Type PDF

Atlante

Europe. This trend is mostly due to increasing attention and involvement from the scientific network and the food and feed industries, as well as governments and their constituents. The book explores the current state of entomophagy and identifies knowledge gaps to inform

File Type PDF

Atlante

primary research institutions, students, members of the private sector, and policymakers to better plan, develop, and implement future research studies on edible insects as a sustainable source of food. The case studies and issues presented in this book cover highly up-to-

date topics such as aspects of safety and allergies for human consumption, final meat quality of animals fed with insects, the legislative framework for the commercialization of this novel food, and other relevant issues.

This book explores the main methods,

Emilio Sereni's classic work is now available in an English language edition.

History of the Italian Agricultural Landscape is a synthesis of the

File Type PDF

agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and

generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work,

Through the biotechnology of this traditional baking method, many sensory, rheological, nutritional, and shelf-life properties have been discovered and/or rediscovered. Bakery industries are greatly attracted by the potentials that sourdough presents,

and new industrial protocols are being developed. To the best of our knowledge, there has been no single book dedicated to sourdough biotechnology, and which clearly demonstrate its potential. This book aims at defining and highlighting the

and the modern wine
appellation known as
Chianti Classico. In
1716, Tuscany's
penultimate Medici
ruler, Cosimo III,
appointed the region of
Chianti, along with
three smaller areas in
the Florentine State,
as the world's first
legal appellations of
origin for wine. In the
succeeding centuries,

File Type PDF

this milestone was all but forgotten. By the late nineteenth century, the name Chianti, rather than signifying this historic region and its celebrated wine, identified a simple Italian red table wine in a straw-covered flask. In the twenty-first century, Chianti Classico emerged as

one of Italy's most dynamic and fashionable wine zones. Chianti

Classico relates the fascinating evolution of Chianti as a wine region and reveals its geographic and cultural complexity.

Bill Nesto, MW, and Frances Di Savino explore the townships of Chianti Classico
