### ~~Stargazing in 2020~~

The best binoculars for stargazing have a magnification of between 7x and 10x with the objective lens ranging between 50mm and 100mm. This allows you to see great astronomical detail.

Binoculars with lower magnification power are an excellent choice because they offer a

**Budget: \$150-250** □ If you're on a tight budget but still want to spend some time stargazing, you'll want to spend around at least \$150 for a good pair of binoculars.

Magnification powers typically range from 10x to 25x in this range, with lens diameters usually around 80mm.
