vascular system, is an organ system that permits blood to circulate and transport nutrients (such as amino acids and electrolytes), oxygen, carbon dioxide, hormones, and blood cells to and from the cells in the body to provide nourishment and help in fighting diseases, stabilize temperature and pH, and maintain homeostasis.

Circulatory system - Wikipedia

Clinical examination of the patient, surgical intervention and imaging techniques, and examination of cardiac tissues are meaningless without an appreciation of basic anatomy. This chapter reviews the gross, light microscopic and ultrastructural anatomy of cardiovascular tissues. Methods of heart and blood vessels examination are discussed.

circulatory system CHAPTER 9. CHAPTER NOTES □ The type of hypertension is not used as an axis. □ Acute MI codes changed from 8 weeks in ICD -9 to 4 weeks or less in ICD-10. □ A code from category I22 must be used in conjunction with a code from category I21.

Chapter 9: Diseases of the Circulatory System (I00-I99)

Unique for its role in human reproduction, a gamete is a specialized sex cell carrying 23 chromosomes—one half the number in body cells. At fertilization, the chromosomes in one male gamete, called a sperm (or spermatozoon), combine with the chromosomes in one female gamete, called an oocyte. The function of the male reproductive system (Figure 27.2) is to produce sperm and transfer

susceptible to pathology ...

Anatomy and pathology of the heart and major vascular system  
The central neuronal networks within the spinal cord, brainstem and hypothalamus that are responsible for controlling cardiovascular autonomic outflows have been identified. This provides a basis for understanding the role of the central nervous system (CNS) in homeostatic regulation of circulation and the changes that accompany pathologies of the cardiovascular system.

Central nervous control of the cardiovascular system ...

Circulatory System . The circulatory system supplies the body's tissues with oxygen-rich blood and important nutrients. In addition to removing gaseous waste (like CO<sub>2</sub>), the circulatory system also
