but its garment sector is the world's second-largest exporter of clothes and employs about 4 million people. Last year, the Green Climate Fund, the main U.N.-backed climate finance channel for ...

Composition research consistently demonstrates that the social context of writing determines the majority of conventions any writer must observe. Still, most universities organize the required first-year composition course as if there were an intuitive set of general writing "skills" usable across academic and work-world settings. In *College Writing and Beyond: A New Framework for University Writing Instruction*, Anne Beaufort reports on a longitudinal study comparing one student's experience in FYC, in history, in engineering, and in his post-college writing. Her data illuminate the struggle of college students to transfer what they learn about "general writing" from one context to another. Her findings suggest ultimately not that we must abolish FYC, but that we must go beyond even genre theory in reconceiving it. Accordingly, Beaufort would argue that the FYC course should abandon its hope to teach a sort of general academic discourse, and instead should systematically teach strategies of responding to contextual elements that impinge on the writing situation. Her data urge attention to issues of learning transfer, and to developmentally sound linkages in writing instruction within and across disciplines. Beaufort advocates special attention to discourse community theory, for its power to help students perceive and understand the context of writing.

The gold-standard guide from the AAP and ACOG -- newly updated and more valuable than ever! Significantly revised and updated, the new 8th edition of this bestselling manual provides the latest recommendations on quality care of pregnant women, their fetuses, and their newborn infants. Jointly developed by the American Academy of Pediatrics (AAP) and American College of Obstetricians and Gynecologists (ACOG), this unique resource addresses the full spectrum of perinatal medicine from both the obstetric and pediatric standpoints. New in the 8th editon: New section on suggested levels of maternal care from birth centers to Level IV institutions New sections on screening for preterm delivery risk added to chapter on antepartum care New topics covered include the timing of cord clamping, the need (or not) for bedrest, and updates in hypertension Guidance regarding postpartum contraception recommendations has been expanded New section on mosquito-borne illnesses (including Zika) New section on infections with high-risk infection control issues Updated recommendations on neonatal resuscitation, screening and management of hyperbilirubinemia, and neonatal drug withdrawal.

Featured on Forbes as a "marketing book you have to read before your competition!" As seen on Forbes, Entrepreneur Magazine, Inc. Magazine, Search Engine Land, Marketing Land and more. Take control now! Learn how to become an influencer from veteran UCSD teacher, online marketing consultant and CEO, John Lincoln. This book as exact, step-by-step strategies to reaching influence status. Get it now! It is all for a good cause. 100% of proceeds from the first 1,000 books sold will be donated to families where a member is struggling with cancer. Help us reach our goal. Digital Infleuncer Book Description | by John Lincoln, MBA, CEO, Entrepreneur, UCSD Teacher Who will you be in life? Will you be a follower? Or will you be an influencer? Definition Digital Influencer: An online persona with the power to stimulate the mindset and affect the decisions of others through real or perceived authority, knowledge, position, distribution or relationships. This book does not hold anything back. But neither can you if you want to be an influencer. You have to fully dedicate yourself, otherwise it is impossible. Too often, people believe that influencers are born, not made, and that we can't learn how to do what they do. Wrong! You can become an influencer and do so much more quickly if you are focused and know the right steps to take. This practical guide to becoming an influencer in your industry will explain what influence is and how it works. It will show you how to grow your following, build credibility and develop your identity as an authority in your field. It will provide direction in how to educate yourself, create compelling content, harness the power of social media and engage with your community. It will teach you how to build an online persona that is so powerful, a simple social media update or blog post will be able to affect change in your industry. This process works. I have done this for myself and hundreds of clients. This book is your shortcut to reaching influencer status fast. Instead of wasting decades or even your entire life trying to figure out what you need to do, I'm just going to tell you how it works. I'll also help you develop a personal plan. I am going to start off by giving you some important background information and concepts that are critical to know if you want to become an influencer. As we progress, I will give you more specifics regarding tools, strategies and even a timeline. This book is the complete guide to become a leader and influencer in your industry. Buy it now, it will be one of the best investments you have ever made in your career and life. Short Bio - John Lincoln John Lincoln is CEO of Ignite Visibility and a digital marketing teacher at the University of California San Diego. Lincoln has worked with over 400 online businesses and has generated millions in revenue for clients. He is a noted author on Search Engine Land, Marketing Land, Search Engine Journal and Entrepreneur Magazine and has been featured on Forbes, CIO Magazine, Good Morning San Diego, the Union Tribune and more. Lincoln has been awarded top conversion rate expert of the year, top SEO of the year, best social media campaign of the year and top analytics column of the year. In 2014 and 2015, Ignite Visibility was named #1 SEO company in California and top 2 in the nation.

*Spectrum Sharing in Wireless Networks: Fairness, Efficiency, and Security* provides a broad overview of wireless network spectrum sharing in seven distinct sections: The first section examines the big picture and basic principles, explaining the concepts of spectrum sharing, hardware/software function requirements for efficient sharing, and future trends of sharing strategies. The second section contains more than 10 chapters that discuss differing approaches to efficient spectrum sharing. The authors introduce a new coexistence and sharing scheme for multi-hop networks, describe the space-time sharing concept, introduce LTE-U, and examine sharing in broadcast and unicast environments. They then talk about different cooperation strategies to achieve mutual benefits for primary users (PU) and secondary users (SU), discuss protocols in a spectrum sharing context, and provide different game theory models between PUs and SUs. The third section explains how to model the interactions of PUs and SUs, using an efficient calculation method to determine spectrum availability. Additionally, this section explains how to use scheduling models to achieve efficient SU traffic delivery. The subject of the fourth section is MIMO-oriented design. It focuses on how directional antennas and MIMO antennas greatly enhance wireless network performance. The authors include a few chapters on capacity/rate calculations as well as beamforming issues under MIMO antennas. Power control is covered in the fifth section which also describes the interference-aware power allocation schemes among cognitive radio users and the power control schemes in cognitive radios. The sixth section provides a comprehensive look at security issues, including different types of spectrum sharing attacks and threats as well as corresponding countermeasure schemes. The seventh and final section covers issues pertaining to military applications and examines how the military task protects its data flows when sharing the spectrum with civilian applications.
