A frequent problem area for fiction writers is characterization. If writers jump headlong into a story with only a fuzzy notion about the people who are in it, the result is a collection of characters who are clichéd, stereotypical and not very interesting. *Creating Characters* is an easy to use reference work that looks at character development from many different angles. The book does not tell writers how to write. Instead, it generates a thought process by asking crucial questions about characters' internal and external traits, wants, needs, likes, dislikes, fears, beliefs, strengths, weaknesses, habits and backgrounds. Following these questions, the writer will find an ever deeper and wider array of options. Thus, *Creating Characters* helps writers delve as deeply into a character's psychology as they want. All characters, and the stories they people, can be made richer and more compelling.

You've researched your character extensively, tailored her to your audience, sketched hundreds of versions, and now you lean back content as you gaze at your final character model sheet. But now what? Whether you want to use her in an animated film, television show, video game, web comic, or children's book, you're going to have to make her perform. How a character looks and is costumed starts to tell her story, but her body language reveals even more. *Character Mentor* shows you how to pose your character, create emotion through facial expressions, and stage your character to create drama. Author Tom Bancroft addresses each topic with clear, concise prose, and then shows you what he really means through commenting

The Science of Writing Characters is a comprehensive handbook to help writers create compelling and psychologically-credible characters that come to life on the page. Drawing on the latest psychological theory and research, ranging from personality theory to evolutionary science, the book equips screenwriters and novelists with all the techniques they need to build complex, dimensional characters from the bottom up. Writers learn how to create rounded characters using the 'Big Five' dimensions of personality and then are shown how these personality traits shape action, relationships and dialogue. Throughout The Science of Writing Characters, psychological theories and research are translated into handy practical tips, which are illustrated through examples of characters in action in well-known films, television series and novels, ranging from Three Billboards Outside Ebbing Missouri and Game of Thrones to The Bonfire of the Vanities and The Goldfinch. This very practical approach makes the book an engaging and accessible companion guide for all writers who want to better understand how they can make memorable characters with the potential for global appeal.
