You need a small flat blade screw driver but you will only use the 2 adjustment pots to the right of the Directed 508D sensor. These 2 adjustment pots change the way the invisible bubble gets bigger and smaller when turning the adjustment screw. The first thing you need to note only turn the screw in very small amounts.

Directed high end alarms have a 'warn-away' feature which is also triggered by the 508D accessory. Installation is fairly strait forward when the alarm module installation guide sheet is available--it is just a matter of plugging into the correct port. In our case where we use two units, the second unit must be spliced into the first with either a 'Y'-connector or surgery. Do not plug in more ...
