Welcome to the specialization course of  
Designing data-intensive applications. This  
course will be completed on four weeks, it  
will be supported with videos and  
exercises. By the end of this specialization,  
learners will be able to propose, design,  
justify and develop high reliable  
information systems according to type of  
data and volume of information, response  
time, type of processing and queries in  
order to support scalability,  
maintainability, security and reliability  
considering the ...

Designing Data-Intensive Applications

Reading Notes Try to read and

understand as much as possible in one  
hour per day and keep straight to 14 das.

As usual, there are reading notes (Aaron  
think it's important, because ABC). System

Design is all about handle trade-off (Same  
as our day to day life). Feel free to share

Where to buy Designing Data-Intensive Applications (DDIA)

What a great book Designing Data-Intensive Applications is! It covers databases and distributed systems in clear language, great detail and without any fluff. I particularly like that the author Martin Kleppmann knows the theory very well, but also seems to have a lot of practical experience of the types of systems he describes.
