Case studies help identify the emerging trends and influences that dominate the political decision making and policy behavior of many states in the Middle East. The chapters investigate foreign policy challenges and debates in various states, changing relations and balance of power between them, and the continuing role of the US in the region.

Counterterrorism: Reassessing the Policy Response promotes a more nuanced understanding of the effectiveness of current counterterrorism practices and the need for reform. It challenges government, media, and academic accounts that exaggerate terrorist threats, particularly in comparison to other threats such as organized crime. Author BenoGomis r

Numerous jurisdictions worldwide have augmented their ratification of the New York Convention of 1958 with the UNCITRAL Model Law 1985 (UML), which takes a giant step forward toward global uniformity in legal application and understanding of the arbitration process. This book develops a standard or benchmark for the UML objective of uniformity, using the relevant legislation and case law of Hong Kong, Singapore, and Australia to consider whether a uniform approach to implementation of the UML and its interpretation is being achieved across those jurisdictions. The author's methodological tools are eminently adaptable to other jurisdictions. Given the importance of the ability to set aside an arbitral award, the body of case law on setting aside and the directly related area of enforcement, the emphasis throughout is on Article 34. In addition, the study considers: - the meaning of uniformity in law and in the context of the UML; - the correct approach to interpretation of the UML pre and post Article 2A; - the interpretational relationship between the UML and the Convention on Contracts for the International Sale of Goods (CISG); - the relationship between the UML and the New York Convention; - the degree of textual uniformity of Article 34 with the three jurisdictions focused on; and - the degree of applied uniformity of Article 34 both in terms of juristic methodology and similarity of results. The author, with more than thirty years of practice in the field of commercial arbitration in Hong Kong, has had access to voluminous cases spanning decades and brings his specialist expertise to the subject. This book considers whether the UML has succeeded in its aim of achieving uniformity. It serves as a guide, both academic and practical, to exploring and adopting the correct approach to the interpretation of the UML as well as to the method of classification of court decisions under the UML. This study is of immeasurable academic and practical value.

Intermediate First Year Commerce & Accountancy Test papers Issued by Board of Intermediate Education w.e.f 2013-2014.

One of this century's most significant events, China's maritime transformation is already making waves. Yet China's course and its implications, including at sea, remain highly uncertain—triggering intense speculation and concern from many quarters and in many directions. It has never been more important to assess what ships China can supply its navy and other maritime forces with, today and in the future. China's shipbuilding industry has grown more rapidly than any other in modern history. Commercial shipbuilding output jumped thirteen-fold from 2002-12. Beijing has largely met its goal of becoming the world's largest shipbuilder by 2015. Yet progress is uneven, with military shipbuilding leading overall but with significant weakness in propulsion and electronics for military and civilian applications alike. Moreover, no other book has answered three pressing questions: What are China's prospects for

Read Online English Paper 3 2014 March Question 11

success in key areas of naval shipbuilding? What are the likely results for China's navy? What are the implications for the U.S. Navy? To address these critical, complex issues, this volume brings together some of the world's leading experts and linguistic analysts, often pairing them in research teams. These sailors, scholars, analysts, industry experts, and other professionals have commanded ships at sea, led shipbuilding programs ashore, toured Chinese vessels and production facilities, invested in Chinese shipyards and advised others in their investment, and analyzed and presented important data to top-level decision-makers in times of crisis. In synthesizing their collective insights, the book fills a key gap in our understanding of China, its shipbuilding, its navy, and what it all means. Their findings will fascinate and concern you. While offering different perspectives, they largely agree on several important points. Through a process of "imitative innovation," China has been able to "leap frog" some naval development, engineering, and production steps and achieve tremendous cost and time savings by leveraging work done by the U.S. and other countries. China's shipbuilding industry is poised to make the PLAN the second largest Navy in the world by 2020, and "if current trends continue" a combat fleet that in overall order of battle (i.e., hardware-specific terms) is quantitatively and even perhaps qualitatively on a par with that of the U.S. Navy by 2030. Already, Chinese ship-design and -building advances are helping the PLAN to contest sea control in a widening arc of the Western Pacific. China continues to lack transparency in important respects, but much is knowable through the interdisciplinary research approach pioneered by the Naval War College China Maritime Studies Institute in the series "Studies in Chinese Maritime Development," of which this is the sixth volume.
