This dual-language dictionary lists over 20,000 specialist terms in both French and English, covering architecture, building, engineering and property terms. It meets the needs of all building professionals working on projects overseas. It has been comprehensively researched and compiled to provide an invaluable reference source in an increasingly European marketplace.

Providing a structured vocabulary for all levels of undergraduate French courses, this text offers coverage of concrete and abstract vocabulary relating to the physical, cultural, social, commercial and political environment, as well as exposure to commonly encountered technical terminology.

Lists over 1,200 housing-related terms that reflect current construction terminology, providing definitions and French equivalents for each.

In the World Library of Educationalists series, international experts themselves compile career-long collections of what they judge to be their finest pieces – extracts from books, key articles, salient research findings, major theoretical and practical contributions – so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands and see how their work contributes to the development of the field. This volume brings together articles, essays, poetry, and artwork from Jerome C. Harste ' s extensive career across the field of literacy studies. This book addresses his contributions to early literacy, reading comprehension, ways of knowing, inquiry-based education, and creating critical classrooms—among other topics—in his characteristically whimsical tone. Following the chronology of his career, each section of the book reflects an important theme of Harste ' s work and documents the impact of his contributions on the field. Combining his key articles with historical notes, fun facts, and professional tips, Harste tells stories about encounters with colleagues, and covers everything from seminars he developed and taught, the importance of collaboration, how his thinking and teaching have grown and evolved, ways his scholarship was enhanced through participation in professional organizations, as well as pithy words of advice for fellow scholars. The articles in this collection trace the development of a thought collective which Harste helped create and which continues to shape research and practice in the field of literacy education.

Experience the life-changing of in the Social Anxiety and Depression WorkbookYou need love from yourself and also from the others. That is natural way of life. This is an extensively revised and substantially enlarged 2000 edition of the acclaimed Using French.

The European Landscape Convention was adopted under the auspices of the Council of Europe with the aim of promoting the protection, management and planning of European landscape and organising European co-operation in this area. It is the first international treaty covering all aspects of landscape. It applies to the entire territory of the contracting parties and covers natural, rural, urban and peri-urban areas. It concerns landscapes that might be considered outstanding, commonplace or deteriorated. The convention represents an important contribution to achieving the Council of Europe's objectives, namely to promote democracy, human rights and the rule of law, as well as to seek common solutions to the main problems facing European society. By taking into account landscape, culture and nature, the Council of Europe seeks to protect the quality of life and well-being of Europeans in a sustainable development perspective.

The book showcases examples of university engagement in community initiatives and reports on the results from research and from a variety of institutional projects and programmes. As a whole, the book illustrates how actors at the community (microlevel) and other levels (meso and macro) can make valuable and concrete contributions to the implementation of the Sustainable Development Goals (SDGs) and, more specifically, to achieving the objectives defined at the 2030 Agenda for Sustainable Development. It is one of the outcomes of the " Second World Symposium on Sustainability Science ", which was jointly organised by the Pontificia Universidade Católica do Paraná (Brazil), the Research and Transfer Centre " Sustainable Development and Climate Change Management " and the " European School of Sustainability Science and Research " at Hamburg University of Applied Sciences (Germany), in cooperation with the Inter-University Sustainable Development Research Programme (IUSDRP).
