Geomorphometry is the science of quantitative terrain characterization and analysis, and has traditionally focused on the investigation of terrestrial and planetary landscapes. However, applications of marine geomorphometry have now moved beyond the simple adoption of techniques developed for terrestrial studies, driven by the rise in the acquisition of high-resolution seafloor data and by the availability of user-friendly spatial analytical tools. Considering that the seafloor represents 71% of the surface of our planet, this is an important step towards understanding the Earth in its entirety. This volume is the first one dedicated to marine applications of geomorphometry. It showcases studies addressing the five steps of geomorphometry; sampling a surface (e.g., the seafloor), generating a Digital Terrain Model (DTM) from samples, preprocessing the DTM for subsequent analyses (e.g., correcting for errors and artifacts), deriving terrain attributes and/or extracting terrain features from the DTM, and using and explaining those terrain attributes and features in a given context. Throughout these studies, authors address a range of challenges and issues associated with applying geomorphometric techniques to the complex marine environment, including issues related to spatial scale, data quality, and linking seafloor topography with physical, geological, biological, and ecological processes. As marine geomorphometry becomes increasingly recognized as a sub-discipline of geomorphometry, this volume brings together a collection of research articles that reflect the types of studies that are helping to chart the course for the future of marine geomorphometry.

This is the first volume devoted to the topic of dance and quality of life. Thirty-one chapters illuminate dance in relation to singular and overlapping themes of nature, philosophy, spirituality, religion, life span, learning, love, family, teaching, creativity, ability, socio-cultural identity, politics and change, sex and gender, wellbeing, and more. With contributions from a multi-generational group of artists, community workers, educators, philosophers, researchers, students and health professionals, this volume presents a thoughtful, expansive-yet-focused, and nuanced discussion of dance's contribution to human life. The volume will interest dance specialists, quality of life researchers, and anyone interested in exploring dance's contribution to quality of living and being.

Since its publication in 1963, Sterling Hayden's autobiography, *Wanderer*, has been surrounded by controversy. The author was at the peak of his earning power as a movie star when he suddenly quit. He walked out on Hollywood, walked out of a shattered marriage, defied the courts, broke as an outlaw, set sail with his four children in the schooner *Wanderer*--bound for the South Seas. His attempt to escape launched his autobiography. It is the candid, sometimes painfully revealing confession of a man who scrutinized his every self-defeat and self-betrayal in the unblinking light of conscience.
