What is happening on the affected years? The plastic spring loaded cam chain follower fails & it shreds plastic material that fouls the rotary gear oil pump cutting off oil flow to the engine. The problem is that many are experiencing failures at many different mileages, so it is hard to predict. Additionally, riders likely will not hear anything going wrong.

Harley Davidson Twin Cam Chain Tensioner Problems 1999-2006

Got to ask, have you ever riden a bike other than a Harley, and have you looked at the engine specs of any other manufacturers. Could have called this one, "The Harley faithful embrace 90's technology". Been a listener since the beginning but have to be a bit critical on this one. Yes, you may have guessed that I do not own a Harley.

Is Harley Milwaukee-Eight Motor Gem or Junk? Bikers Talk

There is a verified problem with Harley-Davidson Big Twin compensating sprockets. The compensating sprocket buffers torque from the engine and the limitations with this part may be most obvious in newer, big bore engines. A part that was adequate in an 82-cubic-inch engine may not be adequate in a 103-cubic-inch engine.

How to Diagnose a Harley Compensator | It Still Runs

The tech should be able to look at your oil pump and tell which generation it is. If it is not the latest, and I'm sure it's not, they should replace that part under warranty. If they baunk at that I would push the issue and call the MoCo if necessary.
