New Perspectives on Blended HTML and CSS Fundamentals provides your beginning Web programming students with in-depth coverage of CSS and its use with HTML5. With the New Perspectives proven pedagogy, your students will think critically and understand WHY they're learning WHAT they're learning. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Students and researchers from all fields of mathematics are invited to read and treasure this special Proceedings. A conference was held 25–29 September 2017 at Noah's On the Beach, Newcastle, Australia, to commemorate the life and work of Jonathan M. Borwein, a mathematician extraordinaire whose untimely passing in August 2016 was a sorry loss to mathematics and to so many members of its community, a loss that continues to be keenly felt. A polymath, Jonathan Borwein ranks among the most wide-ranging and influential mathematicians of the last 50 years, making significant contributions to an exceptional diversity of areas and substantially expanding the use of the computer as a tool of the research mathematician. The contributions in this commemorative volume probe Dr. Borwein's ongoing legacy in areas where he did some of his most outstanding work: Applied Analysis, Optimization and Convex Functions; Mathematics Education; Financial Mathematics; plus Number Theory, Special Functions and Pi, all tinged by the double prisms of Experimental Mathematics and Visualization, methodologies he championed.

After more than twenty-three years addicted to methamphetamine and other drugs, David Parnell put an SKS assault rifle under his chin and pulled the trigger. The blast took off half his face, yet somehow he survived. They called Parnell the "miracle man" at the Nashville hospital where he'd been pronounced clinically dead. Following an afterlife experience where he briefly experienced hell, David woke up in the hospital, and he was changed forever, both physically and emotionally. In *Facing the Dragon*, readers will witness the slow, agonizing metamorphosis of a good-looking high school athlete into a violent, drug-dealing, psychotic wife beater whose children were terrified of him. In graphic detail, they will relive his suicide attempts and then walk alongside him as he endures countless surgeries to reconstruct his decimated face and learns how to cope with his hideous disfigurement. Now thirty-nine, Parnell is clean and sober and is making the most of the second chance he's been given, bringing his message about the dangers of meth and other drugs to schools, prisons, churches, and antidrug organizations around the world as a full-time lecturer. By experiencing the nightmare of his life—and his brief glimpse of hell—readers will find hope and healing when facing their own life-threatening dragons.

Dozens of books about the Iraq War have been written by politicians, generals, snipers and Special Forces operatives. This war journal of an enlisted U.S. Marine provides an un-glamorized narrative of a common reservist's deployment to Iraq, from notification of mobilization to final trip home. The visceral experiences of combat are all described in candid detail, along with hazards of homesickness, boredom and loss. In light of the rise of the Islamic State in the area described in the book, the author's story presents a timely account of the challenges of restoring peace in this restive area.

Tamara Aspeling takes you, the would-be owner-builder, through all the steps involved in the process in a way that's logical, accessible and chronological. The book covers the preparation of plans, obtaining local authority approval, costing and estimating, putting the project out to tender, selecting a contractor and negotiating a building contract that's fair to both owner and contractor. Packed with practical, money-saving tips, and filling a much-needed gap in the South African market, *Owner-building Made? Easy* shows you how to anticipate and thus avoid unexpected pitfalls, and follows the house-building or renovation process sequentially from design to completion.

This debate-style reader is designed to introduce students to controversies in gender studies. The readings, which represent the arguments of leading sociologists and social commentators, reflect a variety of viewpoints and have been selected for their liveliness and substance and because of their value in a debate framework. *Taking Sides* actively develops critical thinking skills by requiring students to analyze opposing viewpoints and reach considered judgements.
