Card & James' Business Law is the most detailed and analytical account of business law for those new to the subject. It provides commanding analysis of the English legal system, contract law, tort law, and commercial law together with coverage of company law, and the relevant aspects of employment law. All of this is discussed using relevant examples from the business environment, and the key legal cases to help develop a greater understanding of the interconnections between the law and corporate setting. The new learning features which have been incorporated throughout make a difficult subject more accessible and support study; key case, example, and discussion boxes demonstrate the application of law and highlight core principles, whilst self-test questions allow students to assess their progress. Online Resource Centre The accompanying Online Resource Centre provides a wealth of resources for students to further develop their understanding and test their knowledge, including additional practice questions with answers, a flashcard glossary of key legal terms and quarterly audio updates. Also included is a testbank of MCQs for lecturer use.

This book seeks to fill a gap in the existing literature by describing the formulation, interpretation and enforcement of the rules on consumer contracts in China and the EU, and by mapping key similarities and differences. The study addresses selected issues regarding consumer contracts: sources of law in the two jurisdictions are first discussed to set the scene. Afterwards, one preliminary issue - how to define the concept of a consumer contract - and two substantive topics - unfair terms and withdrawal rights - are dealt with. Apart from the descriptive analysis, the book also provides possible explanations for these comparative findings, and argues that the differences in consumer contract rules can be primarily attributed to a disparity of markets. The book offers a valuable resource, particularly for researchers and practitioners in the fields of private law and comparative law.

In recent years there has been a revival of interest in the philosophical study of contract law. In 1981 Charles Fried claimed that contract law is based on the philosophy of promise and this has generated what is today known as 'the contract and promise debate'. Cutting to the heart of contemporary discussions, this volume brings together leading philosophers, legal theorists, and contract lawyers to debate the philosophical foundations of this area of law. Divided into two parts, the first explores general themes in the contract theory literature, including the philosophy of promising, the nature of contractual obligation, economic accounts of contract law, and the relationship between contract law and moral values such as personal autonomy and distributive justice. The second part uses these philosophical ideas to make progress in doctrinal debates, relating for example to contract interpretation, unfair terms, good faith, vitiating factors, and remedies. Together, the essays provide a picture of the current state of research in this revitalized area of law, and pave the way for future study and debate.

The glamour and mystery of the art auction, gathering interested buyers from across the globe, makes it one of the most fascinating marketplaces in existence. 'Sleepers', artworks or antiques that have been undervalued and mislabelled due to an expert's oversight and consequently undersold, appear regularly. This fascinating new book provides the first extensive study of the phenomenon of sleepers through an in-depth analysis of the contractual relationships, liability and remedies that arise in the context of auction sales.

This book is a second edition of Interpretation of Contracts (2007). The original work examined various issues surrounding the question of how contracts should be interpreted by courts, in particular focusing on the law of contract interpretation following Lord Hoffmann's exposition of the principles of contextual interpretation in Investors Compensation Scheme Ltd v West Bromwich Building Society [1998] 1 WLR 896. As with the original, this new edition provides an overview of the subject, concentrating on elements of controversy and disagreement, rather than a detailed analysis of all the contract law rules and doctrines that might be regarded as interpretative in one sense or another. The book will be concerned with interpretation of contracts generally (following the rule that there are not different rules of interpretation for different kinds of contracts), but with reference to commercial contracts in particular, since this is the area in which the contextual interpretative approach was developed, and where it has most relevance. The overall aim of the second edition remains the same as the first - to produce an accessible and readable guide to contract interpretation for law students, scholars and practitioners.
