In this memoir, there are the themes of masculinity and male friendship. London discusses various life experiences he has had with alcohol, and at widely different stages in his life. Key stages are his late teen years when he earned money as a sailor and later in life when he was a wealthy, successful writer. Alcohol plays a big role in facilitating the themes listed above. The book is about the social facilitation of alcohol, but is also a cautionary tale about the addictive powers of alcohol and its deleterious effects on health. London describes the effects of alcohol along both optimistic and pessimistic lines, insisting at some points that it helped him in his developmental process towards becoming a man as he understood the idea and a writer and at other points that it limited in developing him in a healthy way. It remains an important and enduring milestone of his authorial career and of many of the writers of his period, as well as the milestone of many of the social historians of his period. London insisted that historical literature was always more important in his life than alcohol, however.

They limped painfully down the bank, and once the foremost of the two men staggered among the rough-strewn rocks. They were tired and weak, and their faces had the drawn expression of patience which comes of hardship long endured. They were heavily burdened with blanket packs which were strapped to their shoulders. Head-straps, passing across the forehead, helped support these packs. Each man carried a rifle. They walked in a stooped posture, the shoulders well forward, the head still farther forward, the eyes bent upon the ground. "I wish we had just about two of them cartridges that's layin' in that cache of ourn," said the second man.

It is only until the final five chapters that the nihilism of White Logic is finally revealed and pitted against the "lesser truth" that "makes life possible to persist."
