While to many, LEGO bricks are 'just a toy', to an ever-growing army of fans they provide a challenging and enjoyable modelling medium. These fans, calling themselves 'AFOLs', or Adult Fans of LEGO, have taken it upon themselves to recreate local landmarks using just the bricks that you may find at a local store. LEGO models created by adult fans, however, don't resemble those that many people created as a child. Created by masters of their medium, these fabulously detailed models may contain thousands of pieces - or perhaps just a handful. Either way, the talented artists have an intimate knowledge of every piece and colour available. Skillfully choosing the ideal piece to recreate a well-known landmark, they may create a model indistinguishable from the real thing, or evoke the spirit of a building in just a few small pieces. In fact, landmarks and cityscapes - from the New York skyline to the Sagrada Familia, London's St Pancras and the amazing towers of Beijing and Hong Kong - have long been a source of inspiration for LEGO builders. In this book, LEGO artist Warren Elsmore takes us on a world tour and explores more than 12 global cities and their iconic structures. Each city is examined and recreated in LEGO form. Comprising amazing artwork, exploratory photographs and detailed breakdowns, Brick City looks at the essence of what makes an urban landscape recognizable.

Title: The Crash Crysta: a LEGO® Mystery. A middle-grade novel for 9-12 year-olds... Using LEGOS that he assembles in eerily accurate crash-site scenes, Mack McCarthy (12) can predict why planes crash with dead-on accuracy, amazing his initially doubtful mother and father, a top crash-site investigator. But Mack is sure his power is real, passed on to him through a crystal by his mystical grandfather, who dies just as the book opens. Defying skeptics, Mack uses Legos to solve crash after crash, proving he's got a very rare gift indeed. When Mack's aunt – his only faithful believer all along – ends up on a criminally doomed flight from Thailand, a daring, international, kids-on-the-run, romping story ensues. Mack teams up with school buddies to evade police, as they use any means necessary to save lives. Then, in the ultimate test of Mack's rare gift, he gets to prove his doubters wrong once and for all when he and his father team up with a larger cadre of oddly gifted kids (who mysteriously appear with their LEGOS), to rescue themselves when the flight they are all on encounters fatal trouble.
