Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Save some green by going green with these environmentally friendly gadgets! With concern for the future of our environment growing stronger and more serious every day, there has never been a better time to take a new approach to some of the most popular gizmos and gadgets on the market and learn how you can convert to electronics that have minimal environmental impact. Green gadgets encompass everything from iPods to energy-efficient home entertainment devices to solar laptop chargers and crank-powered gizmos. This helpful resource explains how to research green gadgets, make a smart purchasing decision, use products you already own in a more environmentally friendly way, and say goodbye to electronics that zap both energy and money. Explore the environmental and financial benefits of green gadgets with this friendly reference Discusses which gadgets save energy-and which ones create energy Learn ways to offset your carbon footprint when you can't reduce consumption Get tips for understanding products labels and avoiding "greenwash" Discover how to calculate the energy and money your gadgets consume Get moving and start living green with this informative guide to environmentally and wallet-friendly gadgets! Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Want to know where you can buy \$100 iTunes gift cards for \$85? Did you know you can pay your taxes by using a cash-back credit card? Why are you still paying \$235 a year to rent your cable box? You're leaving money on the table every day, with every transaction you make: changing your oil, withdrawing ATM cash, booking flights, buying insurance, shopping for clothes, squirting toothpaste. But in Pogue's Basics: Money, the third book of this New York Times bestselling series, David Pogue proves that information is money. Each of his 150 simple tips and tricks includes a ballpark estimate of the money you could make or save. Okay, you won't use every tip in the book—but if you did, you'd come ahead by \$61,195 a year.

The three volume set LNAI 9284, 9285, and 9286 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases, ECML PKDD 2015, held in Porto, Portugal, in September 2015. The 131 papers presented in these proceedings were carefully reviewed and selected from a total of 483 submissions. These include 89 research papers, 11 industrial papers, 14 nectar papers, 17 demo papers. They were organized in topical sections named: classification, regression and supervised learning; clustering and unsupervised learning; data preprocessing; data streams and online learning; deep learning; distance and metric learning; large scale learning and big data; matrix and tensor analysis; pattern and sequence mining; preference learning and label ranking; probabilistic, statistical, and graphical approaches; rich data; and social and graphs. Part III is structured in industrial track, nectar track, and demo track.

Change starts at home. In the office. Change starts with you. Your family. Your friends. Change starts with everyday things. One object at a time. Sometimes it can feel overwhelming thinking about all that needs to be done to save our planet. This book is the antidote to that feeling. Easy to read and easy to do – here's all the information and inspiration you need to make a difference, simply by making smart choices about everyday objects, tasks and habits. Environmental scientist Dr Tara Shine guides you from room to room and occasion to occasion with environmentally friendly solutions, backed by science. From swapping bottled soap to bars, to replacing cling film with a simple plate, you will reduce your environmental footprint in an instant, while saving money. This book busts persistent myths and will once and for all show that living sustainably can be both fun and convenient. Besides, it will not only have a positive impact on the environment, but your wellbeing too! 'Dr. Tara Shine is an enlightened big-picture thinker, and with this book she shows that she is equally and delightfully adept at bringing details into focus. This book is all about realising the power you have as an individual by informing yourself, asking questions and making smart choices. By getting becoming active and joining the conversation, you become empowered and you do something about the problem we face rather than feeling powerless in its presence.' Christiana Figueres, Former Executive Secretary of the United Nations Framework Convention on Climate Change 'Tara's book reminds us we all have the power to make changes in our lives. The only way to achieve systemic change is through the actions of many. We can all make that change and bring about climate justice.' Mary Robinson, Chair of The Elders, former President of Ireland, UN High Commissioner for Human Rights and UN Special Envoy on Climate Change 'Dr Tara Shine is a much loved and admired member of the Homeward Bound team - both past participant and now faculty member in the visibility stream. She has many stories to share and is a connected and pragmatic activist. Her book should be handed round, downloaded, talked about and acted on.' Fabian Dattner, founder, Dattner Group & CEO, Homeward Bound

This unique A-Z guide to central heating wiring systems provides a comprehensive reference manual for hundreds of items of heating and control equipment, making it an indispensable handbook for electricians and installers across the country. The book provides comprehensive coverage of wiring and technical specifications, and now includes increased coverage of combination boilers, recently developed control features and SEDBUK (Seasonal Efficiency of Domestic Boilers in the UK) boilers ratings, where known. In addition to providing concise details of nearly 500 different boilers fuelled by electric, gas, oil and solid fuel, and over 400 programmers and time switches, this invaluable resource also features numerous easy-to-understand wiring diagrams with notes on all definitive systems. Brief component descriptions are provided, along with updated contact and website details for most major manufacturers. Ray Ward has spent over 20 years as a specialist in the field of wiring domestic central heating systems and the knowledge he has gained from hands-on experience and staff training is now brought together in this comprehensive handbook.

The Instrument and Automation Engineers' Handbook (IAEH) is the #1 process automation handbook in the world. Volume one of the Fifth Edition, Measurement and Safety, covers safety sensors and the detectors of physical properties. Measurement and Safety is an invaluable resource that: Describes the detectors used in the measurement of process variables Offers application- and method-specific guidance for choosing the best measurement device Provides tables of detector capabilities and other practical information at a glance Contains detailed

descriptions of domestic and overseas products, their features, capabilities, and suppliers, including suppliers' web addresses Complete with 163 alphabetized chapters and a thorough index for quick access to specific information, Measurement and Safety is a must-have reference for instrument and automation engineers working in the chemical, oil/gas, pharmaceutical, pollution, energy, plastics, paper, wastewater, food, etc. industries. About the eBook The most important new feature of the IAEH, Fifth Edition is its availability as an eBook. The eBook provides the same content as the print edition, with the addition of thousands of web addresses so that readers can reach suppliers or reference books and articles on the hundreds of topics covered in the handbook. This feature includes a complete bidders' list that allows readers to issue their specifications for competitive bids from any or all potential product suppliers.

Featuring a great deal of new content and a new full-color, reader-friendly design, HEAT PUMPS, 2e, helps readers learn to install, service, and maintain air source, water source, and geothermal heat pumps. Dedicated troubleshooting chapters provide ample opportunities to apply the steps required for successful completion of every service call. The Second Edition addresses the latest green building codes and includes a wide range of built-in learning aids and real-life examples to help readers develop the knowledge and skills they will need on the job. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The new, 5th edition of BLACK+DECKER Advanced Home Wiring does more than simply make incremental changes to match new national electrical codes. It includes several never-before-seen projects that will challenge even the most experienced home DIYer. Some of these include: a step-by-step demonstration of the right way to wire a three-way switch in any situation; a closer look at new "available neutral" requirements and how they impact traditional wiring configurations; new information on weatherproof boxes and conduit; a primer on three-phase power; and a guide to 240-volt circuitry that eliminates all the confusion. These are higher-level projects, but ones that offer high rewards when they are done right. The latest home wiring products and techniques are also featured in this new edition. If you already have a good understanding of the basics of home wiring and electrical systems, this is the book you need to take your game to the next level.
