The second edition of the Oxford Handbook of Critical Care Nursing has been fully revised to reflect a more systematic approach to care delivery and to follow the patient pathway. Focused on the practical issues of nursing care and nursing procedures, this handbook has been written by nurses, for nurses. Reflecting current best practice, the Oxford Handbook of Critical Care Nursing is an easily accessible and evidence-based guide for all levels of nursing staff working in critical care environments. It provides the nurse at the bedside with the answers to day-to-day problems experienced when caring for critically ill patients, and is also a guide to some of the less commonly encountered issues. The new edition of this handbook will continue to help support novice and experienced staff in critical care environments. Now including more detail on the psychological issues facing critically ill patients, and more information on the intricacies of receiving a critically ill patient and transferring from a critical care environment, this handbook is a concise, practical, and comprehensive resource.

Fast access to concise, targeted information on all essential aspects of critical care nursing Written by experienced specialist nurses and packed full of up-to-the minute guidance and information Patient-centred, evidence-based, and in line with the latest guidelines An indispensable companion for practising and senior student nurses in a variety of care-settings Features strong emphasis on communication, team working and collaboration Includes newer aspects of critical care such as critical care outreach, major incident, and flu pandemic planning The Oxford Handbook of Critical Care Nursing has been written as a handy reference guide for nurses who are new to the critical care area, as well as a reminder for those with more experience. Each section provides an overview of individual problems, and the related physiology and level of knowledge required to deal with them. The book sets the context for nursing within a continuum of critical care starting from early recognition of acute deterioration and the need for critical care outreach, through to patient outcomes and their follow-up, and evaluation of care post-discharge. Nursing specific skills are highlighted with a holistic approach to patients and their families. Reflecting best practice, this book provides the essence of what is important to the delivery of highly skilled and caring critical care nursing, in an easy to access and readable format. Providing the nurse at the bedside with the answers to many day-to-day problems experienced when caring for critically ill patients, this is also a guide to some of the less commonly encountered issues, such as planning for major incidents and epidemics. Readership: Aimed at general intensive care nursing course students, nurses working in general intensive and high-dependency units, more experienced critical care nurses, and allied health professionals.

The critical care management of patients with life-threatening neurological conditions requires the ability to treat neurological injuries, manage medical complications and perform invasive procedures whilst balancing the management of the brain and the body. The Oxford Textbook of Neurocritical Care provides an authoritative and up-to-date summary of the scientific basis, clinical techniques and management guidelines in this exciting clinical discipline. This highly authoritative textbook is conceptually divided into three sections. Section 1 provides an accessible guide to the general principles of neurophysiology and neuropharmacology, cardiorespiratory support, management of fluids and intracranial hypertension. Section 2 outlines the use of multiple monitoring modes which are crucial to diagnosis and management. Section 3 covers the management of the major pathologies encountered during neurointensive care with an emphasis on evidence-based practice or consensus guidelines to provide a cohesive and definitive clinical resource. Authored by an international team of expert practitioners this textbook reflects world-wide practice and guidelines. This volume is published with a concurrent online version, which features access to the full content of the textbook, contains links from the references to primary research journal articles, allows full text searches, and provides access to figures and tables that can be downloaded to PowerPoint ®. Designed for consultants and trainees in neurocritical care, The Oxford Textbook of Neurocritical Care is also accessible to the general critical care physician and trainees who need a definite and authoritative resource to meet the unique needs of neurocritically ill patients.
