This Polaroid TV lasted less than three (4) years. It caught fire and that was the end of it. Polaroids only response was, "it is out of warranty." This unit ran hot from the beginning and the DVD player was a pain to operate. Sometimes it would take a half hour to get a single dvd to play, sometimes it just wouldn't play at all.

Electric Cables Handbook provides a comprehensive and substantial coverage of all types of energy cables--from wiring and flexible cables for general use, to distribution, transmission and submarine cables. It includes information on materials, design principles, installation, operating experience and standards, and several appendices contain extensive data tables on commonly used cable types and their properties. Electric Cables Handbook is an extensive source of up-to-date and essential information for electrical engineers, contractors, supply authorities and cable manufacturers.

The academic treatment of the environment and nature, since the 1980s, has been formalized in sub-disciplines like environmental history, environmental philosophy, ecocriticism, and eco-spirituality. Within these disciplines the concept of nature has been variously employed to reorient humanity to a holistic moral standard. In each case there is general consensus that inquiry ought to turn on moral considerations of the interaction of humans and the environment; with implied admonitions to live sustainably. Lending credence to the Earth as a superorganism in its own right, these modern ecological expressions can be traced to Rachel Carson's revelations in Silent Spring. However, they have a long pre-history which appears in monistic philosophy, the spirit of Deism, in both Romanticism and the Enlightenment, and in political expressions of the idea of Nature's God, designed to promote a secular vision of the state and to overturn predatory religious rivalries. With this literary momentum, Natural Communion, volume 40 of Religion and Public Life, gathers interdisciplinary essays which reconfigure humanity within an ecotheological anthropology and which treat the idea of the sacred from the perspective of an Earth-centered spirituality, thus redefining humanity's response to ecological challenges and initiating a new status within a more expansive cosmology complete with a naturalized conception of Divine Reality.
