The first edition of the Printing Ink Manual was published by the Society of British Printing Ink Manufacturers in 1961 to fill the need for an authoritative textbook on printing technology, which would serve both as a training manual and a reliable reference book for everyday use. The book soon became established as a standard source of information on printing inks and reached its fourth edition by 1988.

Printing inks are made of four basic components: •  
Pigments- to colour the ink and make it opaque • Resins-  
which bind the ink together into a film and bind it to the  
printed surface • Solvents- to make the ink flow so that it  
can be transferred to the printing surface • Additives-  
which alter the physical properties of the ink to suit di  
fferent situations
