## SAP Query Step by Step Guide - STechies
The SAP Query tool, in its standard form, is designed so that an end user with no technical skills can create a report from scratch. It has five basic screens that an end user can go through to create a report.

## Creating Basic Reports with the SAP Query Tool
For more information about the SAP Query features and its use, see the documentation for SAP Query. To evaluate data in the Transaction Manager using SAP Query, you should use the logical databases for the Transaction Manager. The logical databases have been designed in a way so that you can use them according to their evaluation purposes.

**SAP Library – Tools**
I'm going to be making "use" of this query often as a template and example of how to quickly and easily setup future Query Manager queries. I know some people like to make things more complex and sort of "merge" the declare statements with the SET statements… but I just find that outright confusing.

**Query Manager Syntax | SAP Blogs**
The Query Manager Fiori interface allows you to access your reports from anywhere – you don't have to be logged into a computer with SAP GUI installed. You can run and process reports from web browsers, mobile devices, self-service portals, HR Renewal portals or even from within SAP SuccessFactors Employee Central.

**Query Manager™: Solving your SAP HCM Reporting challenges**
The query manager narrows down the list of queries only to those with the name containing the value you typed, allowing you to find the required query quickly. To further increase usability, the 'Query Manager' window is now re-sizable. Available in SAP Business One 9.3, version for SAP HANA and SAP Business One 9.3.

**Query Manager Gets User-Friendlier | SAP Blogs**
From the Tools menu, choose Queries Query Manager. The Query Manager window appears. Locate the query you want to change and choose OK. The query results are displayed. Click (Display) located next to Display Query Structure. The query script appears. Click (Edit) and change as necessary. Choose Save. The Save Query window appears.

**Changing a Saved Query – SAP Documentation**
