A scar is an area of fibrous tissue that replaces normal skin after an injury. Scars result from the biological process of wound repair in the skin, as well as in other organs and tissues of the body. Thus, scarring is a natural part of the healing process.

~~Scar-Wikipedia~~

What is scar tissue? Scars are marks on the skin or tissue of the body, which form after trauma and can affect skin, muscles, ligaments and tendons. As part of the body's repair process, new protein (collagen) fibers replace the injured tissue and a scar is formed.

~~Understanding-Scar-Tissue-What-It-Is-How-To-Care-For-it~~

Scarring is part of the body's natural healing process after tissue is damaged. When the skin is wounded, the tissues break, which causes a protein called collagen to be released. Collagen builds up where the tissue is damaged, helping to heal and strengthen the wound.

~~Scars-NHS~~

Scar tissue is part of any healing process, so adhesions develop in almost all patients who undergoing surgery to the abdomen. However, problems can start to occur when this scar tissue becomes fibrotic and develops to a point where it sticks to organs or other loops of bowel.

~~Adhesions-Guts-UK~~

The term adhesions refers to the formation of scar tissue between bowel loops (small or large intestine) and the inner lining of the abdominal wall (peritoneal lining) or with other organs within the abdominal cavity (liver, gallbladder, uterus and its attached Fallopian tubes and ovaries, and urinary bladder).

Laser therapy Laser or light therapy (pulses of light) can reduce the redness in a scar by targeting the blood vessels in the excess scar tissue. For some pitted scars, laser surgery (laser resurfacing) is used to try to make the scar flatter.

~~Scars-Treatment-NHS~~

Scars form when the body undergoes trauma or inflammation of your cells and tissue. In some cases, scar tissues link to form an adhesion, which is a band of scar tissue. The adhesion connects two internal parts, which may restrict movement or hinder things like organs from performing their intended functions.

~~Scar-Tissue-Definition-of-Scar-Tissue-by-Merriam-Webster~~

Scar tissue forms after an injury to bodily tissues. If you cut yourself, have surgery, or tear tissue in the body, scar tissue will develop. The development of scar tissue is part of the normal healing process in the body. Collagen is a substance that is present in all of our body parts.

In this "vivid and inspiring" NYT bestseller (Newsweek), the Red Hot Chili Peppers' lead singer and songwriter shares a searingly honest account of life in the rock scene's fast lane -- from the darkness into the light. In 1983, four self-described "knuckleheads" burst out of the mosh-pitted mosaic of the neo-punk rock scene in L.A. with their own unique brand of cosmic hardcore mayhem funk. Over twenty years later, the Red Hot Chili Peppers, against all odds, have become one of the most successful bands in the world. Though the band has gone through many incarnations, Anthony Kiedis, the group's lyricist and dynamic lead singer, has been there for the whole roller-coaster ride. In Scar Tissue, Kiedis delivers a compelling life story from a man "in love with everything" -- the darkness, the death, the disease. Even his descent into drug addiction was a part of that journey, another element transformed into art. Whether he's honoring the influence of the beautiful, strong women who have been his muses or remembering the roaring crowds of Woodstock and the Dalai Lama's humble compound, Kiedis shares a compelling story about the price of success and excess. Scar Tissue is a story of dedication and debauchery, of intrigue and integrity, of recklessness and redemption -- a story that could only have come out of the world of rock.

The author of Blood and Belonging chronicles one woman's descent into Alzheimer's and her sons' painful witness to the tragedy, which is enhanced by their careers in philosophy and neurology and by strengthened family bonds.

Hard to imagine that no one counts, that only things endure. Unlike the seasons, our shirts don't shed. Whatever we see does not see us, however hard we look. The rain in its silver earrings against the oak trunks. The rain in its second skin. --from 'Scar Tissue II' In his new collection, the Pulitzer Prize-winning poet Charles Wright investigates the tenuous relationship between description and actuality--"thing is not an image"--but also reaffirms the project of attempting to describe, to capture the natural world and the beings in it, although he reminds us that landscape is not his subject matter but his technique: that language was always his subject--language and "the ghost of god." And in the dolomites, the clouds, stars, wind, and water that populate these poems, "something un-ordinary persists." Scar Tissue is a groundbreaking work from a poet who "illuminates and exalts the entire astonishing spectrum of existence" (Booklist).

Poetry. Memoir. Latino/Latina Studies. In SCAR TISSUE, Gustavo Perez Firmat's most revealing and courageous book to date, the widely acclaimed author tells his story of enduring illness and loss between two cultures. More than a recovery journal, this collection of poetry and prose is a reflection on the resources for healing and renewal available to those whose lives are divided between countries, cultures, and languages.

Ex-Special Forces soldier Alex Abbott escaped the Middle East under a cloud and now lives hand-to-mouth in Singapore. Scraping a living as a gun for hire and estranged from his family, Abbott is haunted by ghosts of the past, drinking to dull the pain. Life's tough, but there is one upside - at least he's not in Baghdad. That's about to change. When a job goes badly wrong, Abbott's in hot water. Next he learns that his military son, Nathan, is missing in Iraq. Knowing something is wrong, needing to find his son and desperate for redemption, Abbott has no choice but to go back. Returning to Baghdad, Abbott renews old acquaintances and begins his search for Nathan. The body count rises as old wounds open and he struggles to confront his demons, self-medicating the only way he knows how. But when one of his old crew turns up dead in mysterious circumstances and the link with Nathan is clear, Abbott begins to suspect a trap. But who is the hunter? And who is the hunted?

Caffy's a tough but vulnerable young woman, feisty as they come. She works for Paula's Pots, an all-women team of decorators. When one day she sees through a window what all people in their profession dread - a dead body - the lives of the Pots are changed forever.

Painful story of love and acceptance of loss, looking at the questions of selfhood and selflessness.
