over evolution every day. From a practical standpoint, the book can help address the subject in the classroom and from a substantive standpoint, it provides a remarkable overview of the state of teaching evolution in America.

A recent poll revealed that one in four Americans believe in

both creationism and evolution, while another 41% believe that creationism is true and evolution is false. A minority (only 13%) believe only in evolution. Given the widespread resistance to the idea that humans and other animals have evolved and given the attention to the ongoing debate of what should
