Training Circular TC 21-305-8 Training Program For Medium Vehicles This training circular (TC) provides a training program for the wheeled vehicle operator of medium vehicles (straight vehicles, 5 ton and greater), in accordance with Army Regulation (AR) 600-55. It can be used to train drivers of tactical or commercially- designed vehicles. Instructions in this TC are written in general terms because they include driver tasks for several vehicles. Therefore, use the appropriate vehicle operator's manual in

Read Free Tc 21 305

conjunction with this TC. While developing this TC, each driver candidate was assumed to have a state driver's license and some past driving experience. Less experienced soldiers will need additional subjects and time to train to the standard. This TC provides standardized training and testing in the operation, maintenance, and safety of medium wheeled vehicles. It stresses hands-on training with minimal classroom instruction. It does not include any theater-unique requirements. To provide effective training, each instructor should ensure his operators are trained and tested to the standards in this TC. Any deviation from successfully completing these basic standards will only decrease the soldiers' overall driving effectiveness. This training program offers commanders some alternatives. Chapter 7 contains training and testing for drivers transporting personnel in trucks; Chapter 8, for drivers transporting personnel in buses. For safety reasons, all drivers should be tested on the End Of Course Comprehensive Test (EOCCT) (Chapter 6) before proceeding to Chapters 7 or 8. Also, Chapter 9 includes additional subjects that can be added at the commander's discretion based on the unit's mission. Graduates (licensed drivers) of this training program should be supervised until they have gained the experience to operate safely. They should not be placed in situations that may be above their skill level. Periodically, the supervisor should ride with each driver to observe safe operating procedures and to determine the need for more training.

Training Circular TC 21-305-4 Training Program For The High Mobility Multipurpose Wheeled Vehicle This training circular (TC) provides standardized driver training and testing for the high mobility multipurpose wheeled vehicle (HMMWV) operator in accordance with AR 600-55. It stresses hands-on training with minimal classroom instruction. It does not include any theater-unique requirements. This TC teaches the novice (inexperienced) driver to operate the HMMWV. It also can

Read Free Tc 21 305

be used to teach the apprentice driver. (The apprentice driver is a driver that has been driving military vehicles for at least one year.) The apprentice driver may learn to operate the HMMWV in less time than the novice, assuming that skills learned on other military vehicles are positive skills transferable to operating a HMMWV.

Training Circular TC 21-305-10 Training Program For The Palletized Load System This training circular (TC) provides a training program for the palletized load system (PLS) operator according to AR 600-55. It provides standardized training and testing in the operation, maintenance, and safety of the PLS. It stresses hands-on training with minimal classroom instruction and does not include any theater-unique requirements. During the development of this TC, it was assumed that each driver candidate would have a state driver's license and have extensive experience driving a 5-ton or larger tactical cargo truck. Less experienced soldiers will require additional training in the basic skills and knowledge subjects contained in TC 21-305-8, Training Program for Medium Vehicles. To provide effective training, each instructor should ensure his operators are trained and tested to the standards in this TC. Any deviation from the successful completion of these basic standards will only lessen the soldiers' overall driving effectiveness.

Training Circular TC 21-305-7 Training Program For Light Vehicles This training circular (TC) provides a training program for the wheeled vehicle operator of light vehicles (2 1/2 tons or less) in accordance with AR 600-55. It provides standardized training and testing in the operation, maintenance, and safety of light vehicles. It can be used to train drivers of tactical or commercially designed vehicles. It stresses hands-on training with minimal classroom instruction, but it does not

Read Free Tc 21 305

include any theater-unique requirements. Instructions are written in general terms because this TC includes driver tasks for several vehicles. For this reason, the appropriate vehicle operator's manual must be used along with this training circular. During the development of this TC, it was assumed that each driver candidate would have a state driver's license and some past driving experience. Less experienced soldiers will require additional subjects and time to train to these standards. To provide effective training, each instructor should ensure his operators are trained and tested to the standards contained in this TC. Any deviation from the successful completion of these basic standards will only lessen the soldiers' overall driving effectiveness. This training program offers some alternatives for the commander. Chapter 5 includes additional subjects to allow the flexibility to add subjects based on the mission of the unit. Graduates of this training program (licensed drivers) should be supervised until they have gained the experience to operate safely. They should not be placed in situations that may be above their skill level. Periodically, the supervisor should ride with each driver to observe safe operating procedures and to determine the need for additional training.

This publication, Training Circular TC 21-305-20 / AFMAN 24-306(I) Manual for the Wheeled Vehicle Operator January 2016, provides instructions to help the wheeled vehicle operator maintain a high degree of driving efficiency. This TC does not restrict its contents to any one particular vehicle. It is a guide to normal every day operations and to driving under difficult conditions. When more information is needed for a specific vehicle, check the technical manual (TM) or technical order (TO) written for that vehicle. Today's military operator does considerably more than just drive and has a requirement to master every aspect of the vehicle's capabilities and limitations to include all current sub-components such as technologically advanced communications, navigation, intercom systems, onboard

Read Free Tc 21 305

material handling cranes, self-recovery winches, integrated night-vision devices, weapons support systems, onboard electronic diagnostic systems, and load responsibility. Leaders can use a variety of methods and environments to train and practice the safe operation of Army motor vehicles in accordance with this training circular.

Training Circular TC 21-305-5 Training Program For Equipment Transporters (C-Het, Met, And Let The driver of a light-, medium-, or heavy-equipment transporter is charged with an awesome responsibility. Not only will he be driving one of the largest vehicles in the Army's vehicle fleet but also one of the heaviest vehicles. Therefore, as a prerequisite, the individual must have been qualified and licensed to operate a 5-ton tractor and semitrailer for at least one year before receiving a license to operate an equipment transporter. Therefore, this TC provides standardized driver training and testing for the light-, medium-, and heavy-equipment transporter operator. This TC stresses hands-on training with minimal classroom instruction. It does not include any theater unique requirements. The lesson outlines are used to teach the novice (inexperienced) driver to operate the light-, medium-, and/or heavy-equipment transporter. They can also be used to teach the apprentice driver. (The apprentice driver is defined as a driver that has been driving military vehicles for at least one year.) The apprentice driver may learn to operate the light-, medium-, and/or heavy equipment transporter in less time than the novice assuming that skills learned on other military vehicles are positive skills transferable to operating light-, medium-, and/or heavy-equipment transporter.

Training Circular TC 21-305-3 Training Program For The M939 Series 5-Ton Tactical Cargo Truck This TC provides a training program for the M939 series 5-ton cargo vehicle operator according to AR

Read Free Tc 21 305

600-55. It provides standardized training and testing in the operation, maintenance, and safety of this vehicle. It stresses hands-on training with minimal classroom instruction and does not include any theater-unique requirements. Also during the development of this TC, it was assumed that each driver candidate would have a state driver's license, have completed accident avoidance training according to TC 21-305, and possess an OF 346 (stamped as a learner's permit). The lesson content for this training program is arranged sequentially and separated into three chapters (Chapters 4, 5, and 7). Chapter 4 contains training for driving operations and Chapter 5 for trailer operations. Testing is contained in Chapter 7. For those operators trained on truck operations, testing is conducted after the training in Chapter 4. Operators that are trained in trailer operations are tested after receiving all training in Chapters 4 and 5. This allows the commander the flexibility to tailor 5-ton operator training based on the unit's equipment. Also, all training should be annotated on DA Form 348 (or ULLS-generated DA Form 348-E) according to AR 600-55. To provide effective training, each instructor should ensure his operators are trained and tested to the standards in this TC. Any deviation from the successful completion of these basic standards will only lessen the soldiers' overall driving effectiveness. Graduates of this training program (licensed drivers) should be supervised until they have gained the experience to safely operate the M939 series 5-ton cargo truck. They should not be placed in situations that may be above their skill level. Periodically, the supervisor should ride with each driver to observe safe operating procedures and to determine the need for additional training.

Training Circular TC 21-305-11 Training Program for the Family of Medium Tactical Vehicles Operator May 1999 This TC provides a training program for the Family of Medium Tactical Vehicles (FMTV cargo variants) vehicle operator according to AR 600-55. It was designed for the Medium

Read Free Tc 21 305

Tactical Vehicle 5-ton cargo truck, but also may be used for the Light Medium Tactical Vehicles 2 1/2-ton cargo variant. It provides standardized training and testing in the operation, maintenance, and safety of this vehicle. It stresses hands-on training with minimal classroom instruction and does not include any theater-unique requirements. Additionally, during the development of this TC, it was assumed that each driver candidate would have a state driver's license, have completed accident avoidance training according to TC 21-305, and possess an OF 346 Learners Permit. The lesson content for this training program is arranged sequentially and separated into three chapters (Chapters 4, 5, and 7). Chapter 4 contains training for driving operations and Chapter 5 for trailer operations. Testing is contained in Chapter 7. For those operators trained on truck operations, testing is conducted after the training in Chapter 4. Operators that are trained in trailer operations are tested after receiving all training in Chapters 4 and 5. This allows the commander the flexibility to tailor 5-ton operator training based on the unit's equipment. Additionally, all training should be annotated on DA Form 348, Equipment Operator's Qualification Record (or ULLS generated DA Form 348-E) according to AR 600-55.

Training Circular TC 21-305-9 Training Program For The Heavy Equipment Transporter System This TC provides a training program for the HETS in accordance with AR 600-55. It provides standardized training and testing in the operation, maintenance, and safety of the HETS. It stresses more hands-on training and less classroom instruction. It does not include any theater-unique requirements. During the development of this TC, it was assumed that each driver candidate would have a state driver's license. The driver should also have extensive experience driving a 5-ton tractor and semitrailer or larger combination vehicle. To provide effective training, each instructor should ensure operators are trained

Read Free Tc 21 305

and tested to the standards in this TC. Any deviation from the successful completion of these basic standards will only lessen the soldier's overall driving effectiveness. The lesson content for this training program is arranged sequentially and separated into two chapters. Chapter 4 contains training for truck operations and Chapter 5 contains training for trailer operations. Graduates of this training program (licensed drivers) should be supervised until they have gained the experience to operate the HETS safely. They should not be placed in situations that may be above their skill level. Periodically, the supervisor should ride with each driver to observe safe operating procedures and determine the need for additional training.

Training Circular TC 21-305-6 Training Program for the Tractor and Semitrailer (M915, M931, AND M932) This training circular (TC) provides a distributed training package for the 5-ton (M931/M932) and 14-ton (M915/M915A1) tractor/semitrailer operator according to AR 600-55. To safeguard human resources and equipment, commanders must ensure that an individual is licensed to operate a 2 1/2-ton or larger truck before receiving tractor/semitrailer training. This TC provides standardized training and testing to operators in the operation, maintenance, and safety of the tractor semitrailer combination. It stresses hands-on training with minimal classroom instruction. It does not include any theater unique requirements. To effectively execute this TC, each instructor should ensure his tractor operators are trained and tested to the standards contained in this TC. This TC was specifically designed for the tractor semitrailer combination to include PMCS and vehicle operations. Any deviation from the successful completion of these basic standards will only lessen the soldiers' overall driving effectiveness. This training program offers some alternatives for the commander. Chapter 7 includes additional subjects to allow the flexibility to add subjects based on the mission of the unit. Graduates (licensed

Read Free Tc 21 305

drivers) of this training program should be supervised until they have gained the experience to operate safely. They should not be placed in situations that may be above their skill level. Periodically, the supervisor should ride with each driver to observe safe operating procedures and to determine the need for additional training.
