Fluid Suggestions by Transfer Case Type – Transfer Case ...

Automatic transmissions use a special type of oil, called Automatic Transmission Fluid, or ATF. This fluid has a number of duties in the transmission, including lubrication, cooling and clutch application. ATF even provides the connection between the engine and transmission, through a hydraulic coupling called a torque converter.

I have a Hyster H60XM I need to know what type of fluid goes...

The correct fluid for your transfer is dextron/mercon transmission fluid. To check the fluid level, jack up both ends of the vehicle and be sure to support with jack stands. Make sure vehicle is level. If you look at the rear of the transfer case, you will see two plugs, one lower than the other. Remove the lower plug and if fluid runs out it was overfilled, if nothing runs out, stick your pinky finger in the hole and feel for the fluid level. If it needs fluid, remove upper plug and pour in fluid ...

SOLVED: What type of fluid goes in the 4x4 transfer case ...

Either of the transmissions is fine to use. If you are using a manual transmission, you can look for a fluid that will lubricate your gear and allow smooth shifting. On the other hand, if you are using an automatic transmission, you can use synthetic transmission fluid. Automatic transmission generates a lot of heat.
