Synopsis. Many clock repairers carry out excellent work but avoid cutting their own wheels and pinions, fearing it is too complicated and involved. This book, written by an experienced clock and tool maker, aims to dispel those fears and offers a step-by-step guide to a satisfying aspect of horology. This book is written for both the amateur and professional involved in the making and restoring of clocks, and for anyone who intends to start building up a workshop and requires a guide to the ...

Wheel and Pinion Cutting - Dave West Clocks

Wheel and Pinion Cutting Wheel Cutters. These are form relieved multi-tooth gear cutters. The one on the right is for a watch wheel. The one on the left cuts the bronze asymmetric gears for a Curta mechanical calculator. These cutters were made using the eccentric arbor method described and illustrated in the following sections.

Wheel and Pinion Cutting in Horology: A Historical and ...

Antique clock wheel and pinion cutting. For years we have used outworkers to cut wheels and pinions for clocks that we were restoring or rebuilding. The main reason for this was commercial, the cost of the equipment in relation to how much we would actually use it. We were also limited for space in the workshop. In 2018 we decided to invest in the

Home - J.Malcolm Wild, F.B.H.I. - Sheffield - England ...

Having read many books about watchmaking, no book so far has covered the process of wheel and pinion cutting quite like this one. Where some books will just cover one or two ways of doing something, the author goes in-depth on the various different methods that he knows of, so the reader has a full arsenal of methods to use and see what works for them.
