Consumers who experienced problems with certain outboard motors manufactured by Yamaha may have legal recourse to collect compensation for the cost of repairs and other damages. It has been alleged that the company's first-generation F-Series four-stroke outboard motors (model years 2000 - 2005) contain a serious defect that allows the exhaust passages to corrode and pit severely, ultimately resulting in premature engine problems and failure.

there's no clicking sound when you turn the ignition switch, the solenoid could be at fault. Put a voltmeter on the solenoid's terminals and crank the engine. If the voltmeter registers 12V (assuming the engine is running on a 12V battery), then the solenoid is receiving the correct current and is not working properly.

## Troubleshooting Outboard Starting Problems | Boats.net

The most likely problems to beset older two-stroke outboard engines are with the fuel system. Modern fuels have a shelf life of only a few months, especially when mixed with two-stroke oil, with the fuel leaving a black varnish or gum on the inside of the carburetor when it evaporates.

Starting, Fuel, Shear ...

Check the intake for the presence of mud, weeds, or trash. If the intake is clear, check for a loose hose clamp or broken hose. Quickly losing power in the engine may be due to a clogged fuel filter or fouled spark plugs. Replace the in-line fuel filter, draining any water that accumulated in the engine box.

## Outboard Engines - Yamaha Motor Europe

Yamaha has been producing outboard engines since 1960—almost 60 years. During that time, they have established themselves as the leading outboard engine manufacturer. While Honda's outboard has a long history as well, Honda simply has not established the same recognition and popularity as Yamaha in the boat engine business.

Yamaha Outboard Forum - Marine Engine  
Common problems with outboard boat steering include steering that becomes stiff suddenly, steering that locks up completely, and steering that turns in one direction easily, but does not turn in another. When steering tube grease hardens, it stops the movement of the steering cable, resulting in steering stiffness or lockup.
